Exciting Early Release Day Activities in Club M!

Students will have their choice of 4 engaging activity stations, each lasting 30-45 minutes. There is an option to remain at the same station a second time to finish up projects, or select another activity to join. Students may choose from the following:

**Art & Crafts**

An introduction to art and craft techniques. Students will work with a variety of media including pastels, watercolor, paint, graphite, colored pencils and markers.

**Science**

Our science rotation is meant to engage your students and get them more interested in science. Through science experiments, children engage in hands-on learning about the world around them. They see cause and effect first hand. And they have fun in the process!

**Outdoor Games**

Participants will enjoy fast paced, high-energy group games including dodge-ball, kick-ball, capture-the-flag, parachute games, relay races, basketball and many more. Students will develop their leadership skills, build relationships with teammates, learn good sportsmanship and get plenty of exercise!

**Study Hall**

Students will get lots of support where they need it most with their homework, report writing, technology and reading.

Students need to bring a water bottle and comfortable shoes for activities.
